

# WOTC Meets Smart and Simple Technology

The Work Opportunity Tax Credit (WOTC) is a federal incentive program established in 1996 to promote the hiring of individuals that face barriers to secure employment. Employers that hire and retain WOTC certified individuals earn a tax credit between **\$1,500** and **\$9,600** per person. However, to obtain these tax credits employers must meet to a number of requirements and deadlines, which require time and resources, thus posing a challenge to many.

Companies turn to Walton, to leverage the most sophisticated technology proven to automate and streamline and maximize WOTC. Walton's integrated screening solution transforms the administration of WOTC, eliminating tedious tasks for your staff and delivering maximum results through an effortless user experience.

## Advanced Integrated Technology

Walton partners with best-in-class Applicant Tracking Systems, HRIS and Onboarding platforms to automate your WOTC screening. We also integrate with most Payroll providers to automate the transmission of the data used to administer WOTC.

## Effortless User Experience

Walton's web and mobile questionnaire uses dynamic logic to quickly assess applicants and new hires for WOTC eligibility. Potentially eligible individuals electronically sign and file the required form with a simple click.

## AlwaysON Reporting

Walton's technology platform delivers up-to-the-minute results through a single sign-on or push alerts, keeping you always in-the-know of information you deem important.

“Walton is a master of their craft. Our company has greatly benefited from partnering with them.”
